

Concerning amendments to the Claims of RCE 1.114 submission of 29 November 05 for application 09/892,351
Could the rewritten claim listing be accepted as replacement claims for the RCE?

Please amend claims 1-27 as shown.

Please add new claims 28, 29 and 30.

Please renumber claim 28 as claim 2, causing subsequent claims and dependancies cited to increase by one.
Please renumber claim 29 as claim 9, causing subsequent claims and dependancies cited to increase by one more.
Please renumber claim 30 as claim 20, causing subsequent claims and dependancies cited to increase by one more.

Current claim 18, becomes claim 21 and is amended to refer to the 'image' of new renumbered claim 20.
...image ~~produced~~ as claimed in claim ((17)) 20

Claim 13 (renumbered from claim 11) is independent. Inventive steps involve;
presenting the lenticular array horizontally instead of vertically,
interlacing anaglyphic images instead of stereo pairs
and reverting from unaided lenticular viewing to aided anaglyphic viewing to achieve perception of multiple stereoscopic graduations of vertical parallax and or motion picture from printed image.

Claim 16 (renumbered from claim 14) is independent. Inventive steps involve;
arranging horizontal and vertical parallax with interlaced still or motion anaglyphic images,
arranging strobless perception of full colour to each eye where the image also exhibits horizontal and vertical parallax.

M. Dawson.
